

Patricia Giuffre, M.D.

Kristine A. Eule, M.D.

Gynecology • Obstetrics • Infertility

To Our Patients:

Please note that we strive to provide high quality healthcare. As part of this, certain lab tests may be ordered based on each woman's individual health history and exam.

Possible recommended tests:

- An annual pap smear (sent to Metropath)
- **Human Papilloma Virus** (sent to Metropath)
- **Sexually Transmitted Disease** screening (Chlamydia, Gonorrhea, etc...sent to Metropath)
- Blood work (Cholesterol screening, HIV, TSH, etc...)

Most insurance companies cover an annual exam, but not all the lab tests. It is your responsibility to know if these tests are covered by your insurance company. You should also be aware that you could be responsible if you have a deductible or coinsurance. Should your insurance company not cover these tests, you will receive a bill from the lab.

Please sign below informing us that you are aware of your responsibilities.
